General Orthopaedics

Frank A. Luckay, M.D.

Primary Care *Sports Medicine*

Michael W. Montgomery, M.D.

Orthopaedic Nurse Practitioner

Kaylene John, MSN, APRN FNP-C

This facility has Physician Assistants to assist in the delivery of orthopaedic care. A Physician Assistant (P.A.) is **not** a doctor. A Physician Assistant is a graduate of a certified training program, and is licensed by the state board. Under the supervision of a physician, they can diagnose, treat, and monitor common acute and chronic diseases, as well as provide maintenance care. "Supervision" does not require the constant physical presence of the supervising physician but rather overseeing the activities of and accepting responsibility for the medical services provided.

A Physician Assistant may provide such medical services that are within his/her education, training, and experience. These services may include:

- Obtaining histories and performing physical exams
- Ordering and/or performing diagnostic and therapeutic procedures
- Formulating a working diagnosis
- Developing and implementing a treatment
- Monitoring the effectiveness of therapeutic interventions
- Assisting/performing surgery
- Offering counseling and education
- Supplying sample medications and writing prescriptions (where allowed by law)
- Making appropriate referrals

I have read the above and hereby consent to the services of a Physician Assistant for my health care needs.

I understand that at any time I can refuse to see the P.A. and request to see a physician.

I understand that should I need surgery at a hospital or outpatient surgical center, it will be performed by an Orthopaedic Surgeon.
